

IMSRA

Stayin' Alive

Instagram Reel — 30 Second Ad Script

+ Color Palette & Moodboard

Format	Instagram Reel (9:16 vertical)
Duration	~30 seconds
Music	Stayin' Alive — Bee Gees (via Meta Sound Collection — verify ad clearance)
Inspiration	John Travolta Stayin' Alive music video — reinterpreted through a Pakistani cultural lens
Models	1 lead man + 1 lead woman (good hair, strong screen presence) + 2 supporting (paratha maker, chai wala)
Wardrobe	Pakistani traditional clothing — shalwar kameez, kurtas, khusse, juttis
Color Grade	Wes Anderson — symmetrical, warm, pastel-muted, high contrast accents
Brand Colors	Maroon + Gold (IMSRA bottle palette)

Script

0:00 – 0:03

HOOK — FEET REVEAL

EXTREME CLOSE-UP — FLOOR LEVEL

Black screen. Music kicks in. First shot: Pakistani khusse/juttis on a tiled or cobblestone floor — a direct nod to the Stayin' Alive opening. Camera slowly tilts up.

SOUND: Stayin' Alive intro — that iconic bass line drops.

0:03 – 0:07

CHARACTER REVEAL

SLOW TILT-UP — MEDIUM SHOT

Reveal of the lead man and woman walking confidently toward camera in coordinated Pakistani outfits. Their hair is immaculate — full, healthy, shining. Symmetrical framing, Wes Anderson style. They own the frame.

SOUND: Full song playing. Confident, strutting energy.

0:07 – 0:13

PARATHA BEAT — ON THE A A A A

CLOSE-UP + LONG SHOT (ALTERNATING ON BEAT)

On each 'Ah' of the 'Ah Ah Ah Ah' vocal — CUT to a close-up of a fresh paratha slapping onto a hot tawa. Each beat = one paratha. Then cut to a long shot (rule of thirds) of the paratha maker — fully vibing, moving to the music, tawa in hand. He is dressed in a crisp kurta. The shot is perfectly composed and slightly deadpan — very Wes.

BEAT SYNC — SYNC POINT: Each 'Ah' = one paratha slap. Editor to mark these beats before cutting.

SOUND: A A A A vocal hits sync with paratha slaps on tawa. Sizzle sound design layered under music.

0:13 – 0:18

CHAI WALA BEAT

CLOSE-UP + MEDIUM SHOT (ON BEAT)

On the next musical beat — a chai wala pours a long, dramatic stream of chai into a glass. He is also vibing, slightly swaying. Shot is warm, orange-lit, rule of thirds. The pour is slow and confident — like a performance.

BEAT SYNC — SYNC POINT: Time the pour to land on a strong beat. One fluid motion, no cut during the pour.

SOUND: Music continues. Chai pour sound subtly layered. The beat matches the rhythm of the pour.

0:18 – 0:24

RETURN TO LEADS

MEDIUM-WIDE — SYMMETRICAL

Back to the lead man and woman. They are still walking, now joined by the paratha maker and chai wala in the background — all moving together to the music in perfect Wes Anderson symmetry. Everyone has great hair. The scene feels like a fashion editorial set in a Karachi street.

SOUND: Music at its peak energy.

0:24 – 0:28

PRODUCT MOMENT

MEDIUM CLOSE-UP — FRONTAL

The lead man and woman stop walking and turn directly to camera. Each holds an IMSRA bottle — maroon and gold — at chest height. They smile. Genuine, warm, confident. Hair is perfect. The shot is clean and symmetrical.

SOUND: Music fades slightly under. Last bars playing softly.

0:28 – 0:30

END CARD

TITLE CARD

SOUND: Music out.

Production Notes

Hair direction	Hair is the hero. Models must have full, healthy, well-styled hair. Have a hairstylist on set for touch-ups between every take. Use IMSRA product in the models' hair on the day.
Symmetry	Every wide and medium shot must be symmetrically composed — this is non-negotiable for the Wes Anderson aesthetic. Use a grid overlay on the monitor. Centred subjects, even backgrounds.
Beat sync	An editor should map the Stayin' Alive beat grid before the shoot. Print beat timecodes and give to the director and camera operator so cuts are planned in-camera, not just in post.
Deadpan energy	Wes Anderson characters don't ham it up. Models should vibe subtly — a slight sway, a small smile. Not a Bollywood dance. Controlled, cool, confident.
Wardrobe palette	Coordinate outfits to the Wes Anderson palette below. Avoid pure white or black — lean into dusty rose, olive, cream, mustard. The IMSRA maroon and gold should only appear on the bottle.
Chai & paratha	These are real food moments — the sizzle and steam must be visible. Shoot these on a gas flame. Have multiple parathas ready. The chai pour should be high and slow for drama.

Color Palette & Moodboard

Brand Colors — IMSRA Bottle

Deep Maroon

#6B1A2A

Primary brand / bottle body

	Antique Gold	#C9A84C	<i>Accent / bottle details</i>
	Soft Champagne	#F5E6C0	<i>Light accent / backgrounds</i>
	Warm Cream	#FAF6EE	<i>Base / negative space</i>
	Near Black	#1C1008	<i>Typography / end card bg</i>

Video Color Grade — Wes Anderson Palette

Apply these tones to the grade. The look is warm, slightly desaturated, pastel-heavy with maroon and gold as punchy accents. Think Royal Tenenbaums meets a Karachi street — dusty, golden hour, perfectly composed.

	Wes Peach	#F2C99A	<i>Skin tones / warm fill</i>
	Desert Sand	#D9C89E	<i>Background walls / floors</i>
	Spiced Mustard	#C9A030	<i>Highlights / chai warmth</i>
	Olive Drab	#7A7A45	<i>Foliage / kurta tones</i>
	Dusty Rose	#C4697A	<i>Female wardrobe accent</i>
	Faded Teal	#4A8C8C	<i>Cool shadow tones</i>
	Wes Burgundy	#6B2737	<i>Ties into IMSRA maroon</i>
	Bleached Cream	#F7F0E0	<i>Highlight roll-off</i>

Colorist & Editor Notes

Lift blacks	Do not crush blacks. Wes Anderson lifts the shadows to a warm brown-grey. Blacks should feel like dark tea, not ink.
--------------------	--

Skin tones	Push skin tones toward the peach-gold range. Pakistani complexions grade beautifully into warm amber. Avoid cool or grey skin.
Highlights	Roll off highlights into cream/champagne — avoid clinical white. The IMSRA gold bottle should be the brightest point in the product shot.
Saturation	Slightly desaturate overall, then selectively boost maroon and gold hues to make the bottle pop. Everything else should feel muted and painterly.
Beat cuts	Every cut on a beat. The paratha slaps especially — if it's even one frame off the 'Ah', it breaks the gag. Use a beat map. No exceptions.
Symmetry check	Before the final cut is locked, check every wide shot for symmetry. If a shot is even slightly off-axis, it must be reframed or dropped.

Keep your roots stayin' alive. Get that Pakistani shine.
